- 1639 x 169mm

STEALSHIELD WINDOW PROTECTION

Stealshield panels provide affordable intruder, insect and bushfire protection and have the convenience of being easily openable for painting, cleaning and escape during emergencies. Stealshields are constructed of woven powdercoated stainless steel mesh with apertures less than 2mm to comply with bushfire regulations, encased in timber grain or white trim to blend unobtrusively with timber joinery.

insect screens

	
■ 380BZ bronze insect screen mesh	■ 381B black anodized aluminium insect screen mesh

5 GOOD REASONS WHY YOU SHOULD USE SIKKENS OIL BASED COATINGS

- As a natural oil-based coating it nourishes the timber while at the same time allowing it to breathe.
- It is very easy to apply and can easily be removed from glass etc when accidents occur.
- It is equally easy to re-coat over time without the need for the complicated etching required with plastic acrylic coatings.
- It has excellent longevity
- It 'lubricates' movement of the joinery items that need to slide against each other (eg double hung windows) rather than acrylic coatings which tend to stick together.

SIKKENS ON CEDAR
